

LA NOSTRA STORIA

1992	1998	2006-2008	2019	2024	2025 - Ongoing
The Start!	Cleaner Power Generation solutions	First Hydrogen Pilot Plants	Hydrogen Industrial Plant	Offshore Green Hydrogen	Hydro-methane Separation and SAF Production Unit
Established to supply electrical, instrumental and automation engineering services		CPO-SCT innovative technology suitable for Blue H2 generation	CPO-SCT innovative technology suitable for Blue H2 generation	2.5MW PEM Electrolyser	Blending and De-Blending Facilities and sustainable kerosene from refinery Tail Gas Unit

Capstone technology to decarbonize offshore platform logistics. Nowadays will run onto 10% of Hydrogen

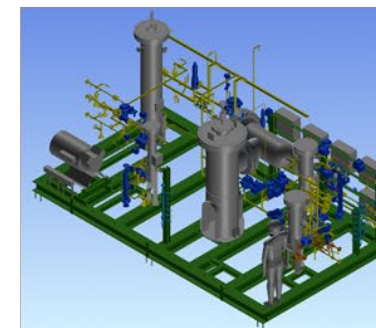

Mantova - 50 Nm3/h

Taranto - 6000 Nm3/h

CrossWind Project

SAF Unit
